PROFILE

I'm a software engineer who loves building mobile apps. I'm always eager to learn, grow my skills, and tackle new challenges in the tech world. My passion for coding drives me to seek fresh experiences that will help me develop both professionally and personally.

EDUCATION

Bachelor Degree 09/2022 – Present | Cairo, Egypt
Faculty of Computer Science Higher Technological Institute
Mobile Development Track

High School 09/2007 – 06/2022 | Cairo, Egypt
English School In Cairo

PROFESSIONAL EXPERIENCE

Back-End Diploma 06/2024 – 11/2024 | Cairo, Egypt
Route Academy
Completed an intensive back-end web development diploma using PHP and Laravel. Built secure, scalable web apps and RESTful APIs, worked with MySQL, authentication, MVC, Eloquent, Blade, routing, middleware, Artisan CLI, Git, and deployment workflows.

Scouring Intern 07/2024 – 09/2024 | Cairo, Egypt
Majid Al Futtaim

- Assisted with supplier research, evaluation, and comparison to support procurement decisions
- Updated and maintained accurate supplier databases to ensure reliable sourcing information
- Helped prepare and issue Requests for Quotations (RFQs) and Requests for Proposals (RFPs)
- Supported general administrative tasks, documentation, and record-keeping
- Contributed to process improvement initiatives and collaborated effectively with the procurement team

Flutter Development Course 09/2022 – 02/2023 | Cairo, Egypt
Udemy
Completed multiple Flutter and Dart courses through Udemy, covering UI/UX, state management, API integration, Firebase, and app deployment for Android and iOS. Built real-world projects and strengthened skills in responsive design, performance optimization, and scalable app architecture.

Part-Time Software Developer 03/2026 – Present
Pay Band Solutions
Working on mobile application development using Flutter, focusing on building scalable apps and integrating APIs. Contributing to developing user-friendly features, improving app performance, and maintaining clean, efficient code.

TECHNOLOGIES & LANGUAGES

Programming Languages
C, C++, C#, Java, Python, JavaScript, PHP, Dart

Frameworks/Libraries
Flutter,Bootstrap,Laravel

Databases
SQL Server,MySQL,Firebase, MongoDB

Tools
Git

Concepts
Data Structures, RESTful API, Agile,SDLC Models,OOP,Operating Systems

Operating Systems

macOS, Windows, Linux (Ubuntu)

PROJECTS

Camp Spot App

11/2022 – 02/2023

Flutter App with Cubit & Firebase

Developed a mobile application using Flutter and Cubit for state management to showcase available camp areas for scouting and outdoor activities. Integrated Firebase for real-time data storage, user authentication, and cloud functionality. The app features a clean, user-friendly interface with categorized camp listings, detailed spot information, and responsive UI. Designed with a modular architecture to ensure scalability, maintainability, and smooth performance.

Attendance Tracker

04/2024 – 05/2024

Flutter App with Firebase, REST API & Bloc

Developed a mobile attendance tracking app for a church organization using Flutter with Bloc for state management. The app integrates Firebase for authentication and real-time data storage, along with REST API connectivity for syncing external records. Features include check-in/check-out functionality, attendance history, and role-based access for members and admins. Designed to provide a reliable and user-friendly solution for managing event attendance within the church community.

Scouts Event Reservation Web

08/2024 – 09/2024

Developed a responsive web application using PHP, SQL, and Bootstrap for scout event reservations. The system automatically generates a unique QR code for each registered user, which is sent via WhatsApp through an integrated messaging API, enabling seamless and secure event entry. Focused on automation, user-friendly design, and efficient event management with a backend powered by PHP and MySQL.

Brand Match

12/2024 – 05/2025

Flutter App with Firebase & Bloc

Created a warehouse and order management app using Flutter and Bloc for structured state management. Designed for suppliers and sales teams, the app features a real-time dashboard to monitor inventory levels, track orders, and generate sales reports. Integrated Firebase for authentication, cloud data storage, and real-time synchronization. Focused on building a responsive and intuitive interface that supports role-based access and streamlines warehouse operations and sales tracking.

Church Scout Group Management App

04/2025 – 03/2026

Flutter App with API Integration & Cubit

Currently developing a mobile application for our church scout group to efficiently manage member data and attendance. The app fetches member information from a REST API and allows recording of attendance for different scout teams. It also features interactive dashboards that provide detailed analytics and insights for each team. Built with Flutter using Cubit for state management, focusing on real-time data updates, user-friendly design, and scalable architecture.

Hospital Management System – Graduation Project

09/2025 – Present

Developed a hospital management mobile application using Flutter, implementing Clean Architecture for a scalable and maintainable structure. Integrated RESTful APIs to manage patient data, appointments, and system operations. Focused on building a structured codebase and a user-friendly interface for efficient healthcare management.

Nezoola Mobile App

03/2026 – Present

Flutter App with API Integration

Developed a Flutter mobile app for booking activities and events, using Clean Architecture for a scalable and maintainable structure. Integrated RESTful APIs for data handling and booking operations, and implemented the UI based on Figma designs to deliver a modern and user-friendly experience.

Luci's Mobile App

05/2026 – Present

Developed a Flutter mobile app for a burger store, allowing users to browse the menu, view product details, customize orders, and place orders. Integrated APIs for dynamic data handling and implemented UI based on Figma designs, focusing on smooth performance and user-friendly experience.
